

|                               |                           |
|-------------------------------|---------------------------|
| Model                         | 1213 Double channel       |
| Mounting method               | Bracket mounting          |
| Outline dimension             | 60.7 * Ø22 mm             |
| Voltage                       | 12V / 24V                 |
| Power consumption             | 3.5 W                     |
| Operating pressure            | -70 kPa ~ 200 kPa         |
| Channel diameter              | 1.5 mm                    |
| Flow rate(25°C, 50kPa, water) | 5.1 g/s                   |
| Silicon hose specification    | 1.5 * 3 mm / 1.6 * 3.2 mm |
| Suggested hose hardness       | Shore hardness: 60        |
